

I still remember this exceptional event so clearly like as if it was yesterday. At the end of the Olympiad organizing committee have distributed special quaternary for feedback for participants. Questions seemed to be very standard and simple to answer except the last one, which was like this - is it possible your country to be considered as the host country for the future IChOs? I was thinking more than five minutes. Georgia as a small country and IChO – so huge event was so incomparable. When I just have started to mark a small square beside "NO" suddenly something whispered in my mind - in the science there is everything possible theoretically! Really, theoretically everything is possible... in future... not tomorrow, not next year or after it... in future... somewhere beyond of the visible and imaginable... And I lost in the deep dreams marked the answer "YES". Only four years have been passed after this event and this mystical future has become the tangible reality. And now, working on the organization of IChO-48 with excellent team: Chair Giorgi Ighenti, Malkhaz Khoperia, Gia Khatishashvili, Rikha Didebulidze, Natia Oekhhikidze, Revaz Korashvili and many other my colleagues and students, I am asking myself: is this reality or dream? Georgia and IChO sounds very nice together but means very much more! Eliznar Elizbarashvili
