

# NORSK GEOLOGISK TIDSSKRIFT (REGISTER 1962-72)

A Norwegian Journal of Geology (Index 1962-72)

utarbeidet av  
FREDRIKKE DONS

## Bind 42 (2) (1962) – Bind 52 (1972)

Konservator Alf Granli utarbeidet et register for bind 1 (1905) – bind 42 (1962). Det ble trykt i 1963 av *Norsk Geologisk Tidsskrift* som et hefte med egen paginering, 36 sider, og inngår egentlig ikke i noe bind av tidsskriftet.

Behovet for et nytt register er blitt stort etter at det nå er trykt 10 nye bind på tilsammen 5100 sider. Dette omfatter bindene fra og med 42 (2), «feldsparbindet», til og med 52. Første del inneholder avhandlinger, notiser, foredragsreferater og meddelelser. Annen del gjelder virksomheten i Norsk Geologisk Forening, samt klublene i Bergen, Trondheim og Gæa Norvegica.

## Volume 42 (2) (1962) – Volume 52 (1972)

Curator Alf Granli prepared an index for volumes 1 to 42 (1905–1962), which was published in 1963 as a special issue of *Norsk Geologisk Tidsskrift*. It does not form part of any volume and has its own pagination (36 pages).

There is now need for a new index since 10 additional volumes have been published, constituting approximately 5,100 pages. This has been prepared for volumes 42 (2) (the feldspar volume) to 52 inclusive. It is divided into two sections, the first of which covers papers, notes, reports of lectures and announcements. The second concerns the activities of Norsk Geologisk Forening (The Norwegian Geological Society) and of the geological clubs in Bergen and Trondheim, and the Oslo students' club – Gæa Norvegica.
