# Instructions to Authors

Manuscripts should be sent to the Editor. The original manuscript should be submitted, with two copies. The author's permanent and temporary addresses must be given. Accepted manuscripts will not be returned until printed, and the author is requested to retain a complete copy of the manuscript. Authors will receive one set of proofs which should be read carefully and returned promptly to Norwegian University Press (Universitetsforlaget AS). The author will be charged for changes against the manuscript made by him in proof. Offprints required should be ordered on a form when returning the first proofs to Norwegian University Press (Universitetsforlaget AS).

## MANUSCRIPT

The manuscript must be typewritten (carbon copy not acceptable) on one side of standard sized paper, double spaced, with an ample left margin. The text must be clear and concise, and written preferably in English; however, Norwegian, Danish, Swedish, French, or German may be used. Manuscripts should be arranged in the following order: (1) Informative but brief title. (2) Author's name; one or more forenames unabbreviated. (3) A *short* abstract, always in English, not exceeding 12 lines (910 letters and spaces), and starting with a repetition of 2 and 1 with a translation in parentheses of non-English titles. (4) The author's professional postal address and a dating of the manuscript. (5) The main text. Use three or fewer grades of headings. Instead of footnotes, insert paragraphs which can be composed in smaller type or use parentheses. Indicate in the left-hand margin the approximate positions for the insertion of Halftone illustrations, Figures and Tables. The words 'Fig.' ('Figs.') and 'Table' (unabbreviated) should be capitalized. (6) A List of References conforming with the examples given below. Abbreviations used should be consistent: necessary editorial changes will be made according to the *International List of Periodical Title Word Abbreviations* (UNISIST/ICSU AB 1970) and *ISO 833-1974* (in some countries these lists are more easily available in national standard documents, such as *DIN 1502*, *Beiblatt 1* and *SIS 03 84 01*). (7) Figure captions on a separate sheet. Add an English translation below captions in other languages. (8) Tables, if any, with captions, numbered with arabic numerals. Tables are now reproduced photographically from camera-ready copy, and should be typewritten to the following widths: single column 10 cm; double column 21 cm. Very large Tables should be typewritten on separate sheets to be printed on facing pages. They must be typewritten on good quality paper with all rules drawn in with a fine pen.

## ILLUSTRATIONS

The journal is now printed in double column format. Illustrations should be reducible to a maximum size of 14.0 × 20.3 cm or less. If not adjustable to the entire width of the type area, 14.0 cm or for the column width (6.7 cm), they must be considerably narrower. Line drawings (maps, sections, etc.) may occasionally be allowed to extend into the inner margin of the page by an additional 2.7 cm. Drawings should be in black Indian ink. Letters should not be smaller than 1 mm after reduction for reproduction.

Photographs should be clear, sharply contrasted, and printed on white paper with glossy finish. Figures may be composed of several units (designated A, B, C, etc.) and mounted in such a way that each unit after reduction is separated by a space at least 1 mm broad. All units should be similar in tone. Illustrations should generally be termed Figures (not Plates) even if occasionally covering an entire page. All Figures should be marked with the author's name and the Figure number. Do not attach captions to the Figures. When not obvious, the top and bottom of Figures, and their scale, should be indicated.
