Cover picture: Landsat-5 TM false colour composite sub-scene (Bands 4, 5, 3 as red, green, blue) covering the Varanger Peninsula, an area of 114 × 90 km, at a 30 m ground resolution. The image was digitally processed to enhance structural elements and lithological contrast as part of a joint project (Lineament and Fault System Analyses in Finnmark and Western Kola Peninsula) between the Geological Survey of Norway and the Russian Academy of Sciences, also partly involving the Geological Institute, University of Bergen. The NW-SE trending Trollfjorden-Komagelva Fault Zone can be seen as a lineament zone across the Varanger Peninsula.
